

```
public class input_methods {  
    public static void main(String[] args) {  
        if (args.length > 0) {  
            System.out.println("cmd args : ");  
            for (var val : args) {  
                System.out.print(val);  
            }  
        } else {  
            System.out.println(" no cmd ");  
        }  
  
        // String name = System.console().readLine();  
  
        // System.out.println("Name :" + name);  
    }  
}
```
